1.Introduction

This project centers on optimizing key business processes within the hotel industry through the application of Business Process Model and Notation (BPMN) and e3value model. By leveraging BPMN for visual representation and a value model for strategic assessment, I aim to enhance operational efficiency, improve guest experiences, and drive overall value in the competitive landscape of hotel management. Also identify Critical Success Factors (CSFs) integral to hotel success, and subsequently derive Key Goal Indicators (KGIs) and Key Performance Indicators (KPIs) to monitor progress towards these factors.

2.Processes

2.1 Customers

Reservation: Customers initiate the process by making reservations through various channels such as the hotel website or phone.

Check-in: Upon arrival, customers provide identification, payment details, and preferences at the front desk. They receive room keys and information about hotel amenities.

Room Service: Customers may request additional services such as room cleaning, laundry, or in-room dining during their stay.

Check-out: Customers settle their bills, return room keys, and provide feedback on their experience before departing.

2.2 Hotel

Reservation Management: Hotel staff manage incoming reservations, ensuring availability and assigning rooms based on customer preferences and requests.

Front Desk Operations: Staff handle check-in and check-out procedures, manage guest inquiries, and address any issues that arise during the stay.

Facilities Management: The hotel maintains its facilities, ensuring cleanliness, safety, and functionality.

2.2.1 Bar and restaurant

Food Preparation: Restaurant staff prepare meals and beverages according to customer orders and menu specifications.

Dining Service: Staff serve food and beverages to customers in the restaurant or through room service, ensuring a pleasant dining experience.

2.2.2 Housekeeping

Room Cleaning: Housekeeping staff clean and prepare rooms for incoming guests, ensuring cleanliness and comfort.

2.2.3 Bell Person

Luggage Assistance: Bell staff assist guests with luggage transportation to and from their rooms, ensuring a smooth check-in and check-out process.

3. Business Process Flow

3.1.1 Complete business

3.1.2. Costumer

3.1.3. Hotel

3.2 Subprocess

3.2.1 Receiving Food and Beverage service

3.2.2 checking out the guest

4. Value Model

4.1 Actors

- *Customer*

Value Proposition: Seeks accommodation, dining, and hospitality services.

Value Exchange: Pays for services rendered (e.g., room charges, dining bills).

- *Hotel*

Value Proposition: Provides accommodation, dining, and hospitality services.

Value Exchange: Receives payment from customers for services rendered; pays restaurant and housekeeping staff for their services.

- *Restaurant*

Value Proposition: Offers food and beverage services to hotel guests.

Value Exchange: Receives payment from the hotel for services rendered; provides prepared meals and beverages to guests.

- *Housekeeper*

Value Proposition: Provides housekeeping services to ensure cleanliness and comfort for hotel guests.

Value Exchange: Receives payment from the hotel for services rendered; provides clean rooms and amenities to guests.

4.2 Value Diagram

5. Other measures

5.1 Critical Successor Factors(CSF)

CSFs are the essential areas where organizations must excel to achieve their mission, goals, or objectives. They represent the critical activities or elements that are necessary for the organization's success. They help focus efforts and resources on the most critical aspects of the business.

- *Customer Satisfaction*
Ensuring high levels of guest satisfaction to encourage repeat business and positive word-of-mouth.
- *Occupancy Rate*
Maintaining a high occupancy rate to maximize revenue and profitability.
- *Service Quality*
Delivering exceptional service to guests to differentiate the hotel from competitors.

5.2 Key Goal Indicators(KGI)

KGIs are measures that provide insight into the achievement of strategic goals or objectives. They are quantifiable metrics that indicate whether the organization is moving towards its desired outcomes. KGIs are often derived from CSFs and reflect the critical aspects of performance that directly contribute to success.

- *Average Customer Rating*
Measures the overall satisfaction level of guests based on their feedback and ratings.
- *Occupancy Rate Percentage*
Indicates the percentage of available rooms that are occupied over a specific period.
- *Staff Training Completion Rate*
Tracks the percentage of staff who have completed required training programs to ensure service quality.

5.3 Key Performance Indicators(KPI)

KPIs are specific, measurable metrics used to evaluate the performance of processes, activities, or individuals within an organization. They provide actionable insights into how

well the organization is performing in relation to its strategic objectives. KPIs are often linked to KGIs and CSFs and help monitor progress towards achieving them.

- *Average Daily Rate*
Measures the average revenue earned per occupied room per day.
- *Customer Retention Rate*
Tracks the percentage of guests who return to the hotel for future stays.
- *Housekeeping Efficiency Ratio*
Evaluates the productivity of housekeeping staff by measuring the number of rooms cleaned per hour.

6. Conclusion

In summary, our analysis of the hotel business process has been enriched by the utilization of the e3value model and BPMN tools, which have provided valuable insights into the intricate interactions and value exchanges within the hospitality ecosystem. Through this framework, we have gained a comprehensive understanding of the critical factors driving success in the hotel industry. By aligning our strategic goals with identified Critical Success Factors (CSFs), and measuring our progress through Key Goal Indicators (KGIs) and Key Performance Indicators (KPIs), we have been able to track our achievements and areas for improvement effectively. These metrics, ranging from customer satisfaction to occupancy rates and service quality, have served as invaluable benchmarks in guiding our efforts towards delivering exceptional guest experiences and optimizing operational efficiency.
